*"I **love** having to click through menus, submenus, and sub-submenus to get to the information I'm looking for."*

-Said no one ever.

What is https://egis.umn.edu/maps ?

The purpose of https://egis.umn.edu/maps is to give members of the University of Minnesota Enterprise GIS a quick and easy way to access maps and related online resources.

How can I sign in to https://egis.umn.edu/maps ?

You will need an account at https://umn-egis.maps.arcgis.com to sign in. If you do not have one already please contact Dan Sward or Tobias Fimpel.

Why are some groups and maps visible to me but not to others?

The visibility of groups and maps is determined by ArcGIS Online *Groups* and ArcGIS Online *Tags*.
By default a number of publicly shared maps are visible. After you sign in you will likely see more groups and maps: Any ArcGIS Online Group that you are a member of and that is tagged with the word *mappage* will be displayed. Any ArcGIS Online item – for example a webmap – that is shared with this Group and is also tagged with the word *mappage* will be displayed.

I want an additional map to be visible to me and some of my colleagues. What shall I do?

You could log in to https://umn-egis.maps.arcgis.com, tag your Group with the term *mappage, and* tag the map with the term *mappage.* The group and map will then show up for anyone who is a member of that Group. Contact Dan Sward or Tobias Fimpel if you have any questions. We are happy to help.

What types of ArcGIS Online items are supported by https://egis.umn.edu/maps ?

Currently ArcGIS Online items of type *Web Map*, *Web Scene*, *Web Mapping Application*, and *PDF* are supported. Other item types may or may not work. If you have a need for other item types to be supported please let us know.

I have an idea for making this a better product. What shall I do?

Please tell us about it! Contact Dan Sward or Tobias Fimpel, or log an Issue on GitHub .
